

COVID-19: information to our employees, our partners and our customers

March 17th, 2020

We at Neo Medical SA (Switzerland) with our subsidiary companies in France, Germany, Spain and the USA, are actively monitoring hospital specific rules, aligning with the local and national authorities and following global public health recommendations. We are also constantly adapting our internal policies to ensure that we continue to provide the highest quality of service and maximize the impact of Neo innovation to every institution where patient surgeries cannot be rescheduled or delayed.

We are dedicated to provide the highest protection to our staff, our customer partners, patients and to all Health Care Professionals:

- Our Technical Perioperative Team will provide any institutional requested support either directly in the OR or virtually.
- Our Logistic and Customer Service departments are fully staffed to ensure a swift replenishment of used material in surgery.
- Our production capacity remains unaffected and is able to continue to ensure supply availability.

We have decided to focus our resources on the above activities, facilitated by virtual communications and we are confident that together we will overcome today's uncertainty.
